

Advancing technology. Saving the planet.

July 22, 2011

Dear Matt,

We want to thank NexGen Consultants for their exceptional work done in helping us upgrade from the Group edition to Professional edition of Salesforce.com. Maureen Eckert's work on this project was instrumental in making it a success. She really took the time to understand what we needed to be done and delivered.

Maureen's contribution in data cleanup and configuration of the Salesforce environment were instrumental in a seamless implementation. We are also utilizing the Salesforce to Outlook functionality and again Maureen's knowledge of the system made setting up our users with Salesforce to Outlook very easy.

In addition, NexGen Consultants provided excellent End User Training.

NexGen really took the time to understand our problems and how to solve them. I would recommend NexGen Consultants to any company that is in need of consulting services in the Salesforce.com platform.

Thanks Again!

Stuart Shaffer
