Nex Gen
Matt Mountain

June 25th 2012

I only recommend businesses that I feel are highly motivated and have shown proven results. I highly recommend Nex Gen and given the opportunity they can make a substantial impact on your business.

As Chief Operations Officer, I work with many companies who have knowledge of management systems and data management. Each year I notice a few outstanding companies that offer a unique perspective and really embrace their mission to provide you with the data solutions your company requires. Nex Gen and Matt Mountain who we worked closing with, have the great analytical skills and ability to grasp the nuances of your business.

This year we did a data migration from our management system with some very specific requirements to accomplish the needed search and access capabilities with our data. Nex Gen performed exceptionally well. I was especially impressed with their ability to deal with complex or abstract matters as they related to our business. Their work clearly showed Nex Gen's ability to be an effective business solution.

Sincerely,

Jeannine A Giesler
