NexGen Consultants,

After working with your company for almost 2 years, I wanted to personally thank you for being so professional and helpful with implementing Salesforce into our company. As a financial firm, we were in need of a company that specializes in Financial Services to get us live on the Salesforce.com environment quickly and efficiently. Your company did an excellent job at helping us understand what was possible with the platform and designing it to meet our individual needs as a firm.

Since going live on Salesforce, we have needed additional help from your staff periodically. Your organization has been very helpful in being available and responsive to us when we have needed your assistance. We are absolutely looking forward to continuing our relationship with NexGen Consultants and we would highly recommend your company to other Wealth Management companies looking to implement Salesforce.

Thanks again for your continued efforts. Please feel free to share this letter with anyone who might be interested.

Cordially,

Matt Dicken
Founder & CEO
