NexGen Team,

We would like to thank everyone involved from your team in the deployment of Salesforce into two of our companies. This project has been a tremendous success.

With your knowledge and expertise in the Salesforce platform, NexGen provided enormous value. This knowledge was instrumental in the design of the right solution and setting up the integration to our back office ERP systems.

The training sessions NexGen provided to our users was invaluable in preparing them to use the new system.

We plan on expanding our use of Salesforce in other areas of the company and we will continue to use NexGen to help with the support and implementations. We appreciate your efforts and would recommend your services to anyone considering implementing Salesforce.

Thank You,

Tim Slaughter
Vice President of Finance
