Dear NexGen,

I would like to thank you for all of your help with our critical Salesforce.com enhancement that you helped us with.

Although we have been up and running for over a year with hundreds of users, we were in need of someone to enhance the application to provide real-time updates to our executives immediately once an Opportunity is "won". Although this sounds easy, our requirement was to create a report that measured (custom) Opportunity Dollar Amounts against (standard) Quota Dollar Amounts. To do so required developing a VisualForce Email Template that is automatically sent to certain Salesforce.com users.

I highly recommend you and your services to all organizations that need custom development on the Force.com Platform. We look forward to working with you on other projects in the future.

Thanks!!

Jill Brabender
Director of Business Services
