

STONEHENGE PARTNERS, INC.

*Private Capital Solutions*

November 23, 2011

Dear Maureen,

Thank you very much for your help in migrating our CRM database to the Private Equity platform of Salesforce.com's Enterprise Edition. After careful consideration, we chose to implement this template because we felt it was the closest fit to our needs, and it has met or exceeded all of our expectations thus far.

I am very grateful for your expertise and assistance throughout the engagement; you did a great job. As our firm was aware that the overall quality of the system is determined largely by the success of the initial implementation, we placed a high value on this process. Despite the nuances of our database and detailed requirements for a new CRM system, I was impressed by your ability to quickly develop a thorough understanding of what we needed as well as a solution for all of our issues. We were very productive and efficient in our meetings, during which you were very attentive and asked very good questions. The comprehensive application review was very beneficial to us in clarifying our requirements once my colleagues and I were able to see how they were being implemented.

Your assistance with migrating our SalesLogix data into Salesforce.com was very helpful. We underestimated the effort required to complete this difficult process and were glad we turned that over to you.

We would highly recommend NexGen to any Financial Services firm looking to deploy Salesforce.com.

Thank you,

Nathan McGill
